10. Both the House and Senate versions of the health care bill include a new tax whereby married couples making a combined annual income of \$50,000, and who do not receive insurance through their employer, would have to pay up to \$2,000 more per year for health insurance than an unmarried couple making the same combined income. Supporters say this will help pay for insurance for many that currently do not have it, while opponents say it is a penalty on marriage. Do you think this is fair or not?

10. Both the House and Senate versions of the health care bill include a new tax whereby married couples making a combined annual income of \$50,000, and who do not receive insurance through their employer, would have to pay up to \$2,000 more per year for health insurance than an unmarried couple making the same combined income. Supporters say this will help pay for insurance for many that currently do not have it, while opponents say it is a penalty on marriage. Do you think this is fair or not?
